Notes:

1. If using a 'Generic' risk assessment, Managers, and others involved are to satisfy themselves that the assessment is valid for the task and that all significant hazards have been identified and assessed. If additional hazards are identified they are to be recorded and attached to the Generic assessment.
2. Only a reference or simple description of the control measures is required. If the risk assessment identifies the need for additional control measures, the hazard will need to be reassessed once the additional controls have been implemented.
3. Risk Assessments are to be reviewed:
 - at a frequency proportional to the risk (eg. high risk – 6 monthly; medium risk – annually; low risk – every 2 years) **As government amendments to COVID19 are now issued monthly the assessment will be reviewed at least monthly**
 - where required by local instructions/procedures.
 - if the safe execution of the activity relies on stringent supervision and/or adherence to a safe system of work.
 - if there is reason to doubt the effectiveness of the assessment.
 - following an accident/incident or near miss.
 - following significant changes to the task, process, procedure, personnel Managers, Coaches and others involved.
 - following the introduction of more vulnerable personnel.
 - Prior to use if a "Generic" assessment.

Managers and others involved are to note that they are responsible and take ownership for production of the Risk Assessment and that they are signing to indicate that they consider the risks acceptable and the assessment is suitable and sufficient.
